# SOMETHING AMAZING...

***Giant's Park is the largest redevelopment site in Belfast today; comprising 340 acres, the park is a strategically located, unique development opportunity in the North Foreshore.***

***At 30 Acres, The Giant's Park Cleantech Hub is a unique component part of the scheme and has been conceived to tackle some of the big economic and environmental challenges of the 21st Century.***

The site has excellent links to airports, major roads and the port. It offers huge potential to attract investment from the cleantech industry and deliver physical, economic and social benefits for everyone.

Infrastructure works have already started and this is the first step in redeveloping Giant's Park, with preliminary works due to be completed by spring 2016 including 1,734 metres of roads, the installation of key services, improved access, new landscaping and planting.

The £9.5m infrastructure spend at the Cleantech Hub is being part financed by the European Regional Development Fund, under the European Sustainable Competitiveness Programme for Northern Ireland, Invest Northern Ireland and Belfast City Council.

Expressions of Interest are now being sought from parties within the Cleantech sector requiring plots of c. 0.5 acres to c. 30 acres.

This unique development project provides a foundation for developers, investors, and occupiers to be part of the cutting edge, forward looking, cleantech business sector.

# LOCATION

**Northern Ireland is part of the European Union and has the advantage of being a region of the UK whilst also benefitting from a land border to the Irish Republic.**

From Northern Ireland there is easy access to the European Union market of 500 million people, and connections to the global market.

Three airports deal with almost seven million passengers per year. Belfast International Airport runs daily scheduled flights to destinations such as New York, London, Paris and Amsterdam.

Between them the ports of Belfast, Londonderry, Larne and Warrenpoint provide some 150 fast ferry and freight sailings per week to Great Britain, Europe and beyond. The Port of Belfast is the busiest port on the island of Ireland.

Giant's Park Cleantech Hub is ideally located to take advantage of these many trade links.

Project Kelvin is an extensive submarine and terrestrial cable deployment that directly connects Northern Ireland to North America with industry leading fiber optic submarine cabling.

# CLEANTECH... A BETTER TOMORROW

The government has recognised the increasing significance of the cleantech sector, and its contribution to the UK economy.

The market is estimated to be growing at around 6% per annum, particularly for key growth areas such as renewable energy and resource management.

Already, it is estimated that the UK environmental industry employs approximately 400,000 people in around 17,000 companies, with an estimated annual turnover of £25 billion.

*\*Source: Invest NI*

“ **THE CLEANTECH HUB HAS THE POTENTIAL TO CREATE GREEN COLLAR JOBS, ENHANCE NORTHERN IRELAND'S ECONOMIC INFRASTRUCTURE, ENCOURAGE INNOVATION, COLLABORATIVE RESEARCH & DEVELOPMENT AND DEVELOP THE GREEN ECONOMY.** ”

*Jonathan Bell MLA  
Enterprise, Trade & Investment Minister  
Northern Ireland Assembly*

# SO WHAT EXACTLY IS CLEANTECH?

**CLEAN TECHNOLOGY INCLUDES RECYCLING, RENEWABLE ENERGY (WIND POWER, SOLAR POWER, BIOMASS, HYDROPOWER, BIOFUELS, ETC.), INFORMATION TECHNOLOGY, GREEN TRANSPORTATION, ELECTRIC MOTORS, GREEN CHEMISTRY, LIGHTING, GREYWATER, AND MANY OTHER APPLIANCES THAT ARE NOW MORE ENERGY EFFICIENT. IT IS A MEANS TO CREATE ELECTRICITY AND FUELS, WITH A SMALLER ENVIRONMENTAL FOOTPRINT AND MINIMISE POLLUTION.**

*'Cleantech' Defined by Wikipedia.com*

  
**GIANT'S PARK**

Belfast's Cleantech Hub

**Being the first of its type in Northern Ireland there are opportunities at Giant's Park Cleantech Hub in the environmental, renewables, and low carbon sectors.**

*The Hub will build upon the technology already in place at Giant's Park, including an existing landfill gas to renewable electricity conversion plant, to create an innovative cleantech business cluster and make Belfast a leading destination for green technology.*

# PLANNING

***In the extract plan opposite the subject site is shown to be land zoned for mixed uses.***

*A Concept Masterplan has been prepared and adopted by Planning Service under the reference:*

***Z/2008/2289/Q***

*This plan sets out a general mix and location of proposed land use:*

***BMAP Key Site Use Requirements:***

- Waste management and recycling facilities;
- Port and port-related uses;
- Class B1: Business (b) call centres and (c) research and development;
- Class B2: Light Industrial Use;
- Class B3: General Industrial Use;
- Class B4; Storage or Distribution Use;
- Open space and associated facilities.

*Proposed land uses will require the grant of specific planning permission following the submission of individual planning applications.*

*Planning service will expect any planning applications to be in conformity with the Concept Masterplan (September 2009) and to deliver a high quality of design.*

*Each application will be determined on its merits against the prevailing planning policy framework and taking account of all material considerations, and where necessary, will be subject to a determination under the requirements of the Planning (EIA) Regulations (NI) 1999.*

*Any development of the site must be in accordance with the Concept Masterplan that has been agreed by Planning Service. The provision of a cleantech cluster can make a valuable contribution towards sustainable development and the aim of the environmental resource park is to support wider government policy focused on sustainable development and a move towards a resource efficient future.*

*The Concept Masterplan provides the framework within which individual planning applications can be brought forward and sets out the background and context of the North Foreshore site, a conceptual development overview envisaged for the site together with non-technical summaries of environmental considerations for any proposed development.*

*The Concept Masterplan also reinforces the Council's commitment to its sustainability objectives setting out a Sustainability Framework that seeks to create the conditions that permit the North Foreshore site to be a place that;*

- Facilitates Economic Development;
- Protects and enhances the Environment; and
- Encourages a "Better Quality of Life"

# PERTINENT INFORMATION

***Developers and their professional teams should be aware of the environmental legacy of closed waste landfill sites and developing contaminated sites.***

*The Developer and their professional team should satisfy themselves of the existing ground conditions, and to undertake any site investigations and surveys required by statutory authorities.*

The Council has completed an Environmental Risk Assessment and Environmental Statements for the North Foreshore Lands comprised of waste management facilities, environmental resource park and public open space.

The Developer will have to satisfy itself and the Council, of the suitability of its proposals for the site taking into account any health & safety issues, ground conditions, planning, site accessibility, and environmental issues.

## ***Development Advantages***

- Branded Environmental Resource Park
- Other current occupiers – NIE, Renewable Power Systems, BCC (Waste Transfer Facility)
- Planning – BMAP/Masterplan (2009)
- High-level environmental monitoring provided for the NFS - groundwater, bird surveys etc
- Transport infrastructure (M2/harbour/airport etc)
- Fully serviced sites with all normal services brought to edge of the site (electricity, water, drainage, BT ducting).
- Green Power export capacity agreed with NIE
- Synergies through co-location with other Cleantech occupiers
- Potential to use environmentally friendly power supply provided from other on-site occupiers
- InvestNI assistance\*
- Land contamination Insurance
- Preliminary Risk Assessment (Golders report)
- Guidance regarding development of a landfill site

## ***Development Constraints***

- Landfill gas management – installation of suitable systems and monitoring regime
- Landfill capping required – construction constraints
- Environmental inspection requirements across the NFS
- BCC access to inspect/repair/replace gas infrastructure
- ASSI/RAMSAR/SPA designation – birds, fauna/flora
- Topography – surcharging and settlement monitoring
- Chemicals in leachate (dictates sub-structure formation at piles)

*\* Where deemed appropriate by InvestNI*

## **Site Options Agreement**

Prior to completion of a lease the contractual agreement with Belfast City Council will be on the basis of a Site Options Agreement which will set out conditions to be fulfilled prior to possession of the site to permit development.

## **Licence To Occupy**

Vacant possession of the site will be granted following satisfaction of the Site Options Agreement conditions in the form of a Licence to Occupy which will provide sufficient control for development works.

## **Lease/Lease Term**

Title to the site will be granted on the basis of a ground Lease only upon satisfactory completion of the development works.

## **Ground Rent/Premium**

Sites will be offered subject to either a capital premium or annual ground rent.

The draft Lease will be in an agreed form and appended to the Site Options Agreement.

## **Service Charge**

An annual service charge will be payable in respect of maintenance of the Giant's Park Cleantech Hub.

# SPARKED YOUR INTEREST? MAKE CONTACT NOW

**ON BEHALF OF BELFAST CITY COUNCIL, WE ARE SEEKING EXPRESSIONS OF INTEREST AND WOULD REQUEST APPLICATIONS AS BELOW:**

**INITIALLY WE REQUIRE YOU TO EXPRESS YOUR INTEREST BY COMPLETING OUR ONLINE APPLICATION FORM AT [WWW.THEGIANTSPARK.CO.UK](http://WWW.THEGIANTSPARK.CO.UK)**

***You will be required to provide the following identification information:***

- Confirmation of personal identity
- Confirmation of business identity
- Details of business size
- Length of time established
- Industry sector
- Category of interest (Investor/Occupier/Developer)

***Additionally we will require confirmation of:***

- Potential requirement site size
- Proposed requirement timescale
- Lease term preference (long/short)

***We are inviting expressions of interest by 27th January 2016 at 5pm***

Once further validation of expressions of interest has taken place we will be engaging with preferred parties who will, subject to signing a Non Disclosure Agreement by 11th February 2016, be given access to our online dataroom.

A closing date for bids will be specified as the process progresses.

**PLEASE DIRECT ANY ENQUIRIES AFTER 27TH JANUARY 2016 TO DAVID MCNELLIS AT LISNEY**
